

T.O.S.S.[®]

The Optimum Sealing System[®]

Introducing **NEW SNAPLON[®]**
Permanent PTFE Mounting Strips

SNAPLON[®]
A graphic element for the SNAPLON logo, featuring a series of vertical black bars of varying heights that resemble a zipper or a comb, with a small black handle-like shape at the end.

For repeatable
placement and
tensioning of the
PTFE coverstrip

Perfect Seals... Every Time

SNAPLON[®]

SNAPLON[®] makes replacing heat sealing cover strips a snap.

SNAPLON[®] is available in rolls. PTFE is sold with mating zipper style plastic strips. By placing your permanent mounting strips in the desired position, you insure repeatable placement and tensioning of the coverstrip for every replacement in the future.

Install Zippers to Jaw Bar Face

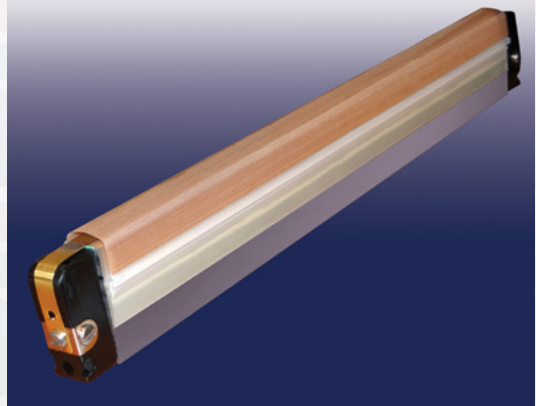

SNAPLON[®], the perfect compliment to **GENUINE TOSS Alloy-20[®]** impulse heat seal bands.

Zip SNAPLON[®] on to Bar Faces

SNAPLON[®] Ensures Consistent PTFE Cover Installations

Be sure to call our TOSS Application Engineers for any assistance you may need in configuring your system.
